For more than 17 years the work of our bureau has impressed through its creativity and appropriateness in design, precision & planning efficiency, and the adherence to quality, budgets and deadlines in implementation.

In this period, Clemens Kirsch Architecture has been responsible for construction projects totalling around 180 million euros, 20% of these as general planner. We are proud of having implemented all projects without any planning flaws or building damage, and always adhering to schedules and budgets.

In our work we endeavour to prove that innovation and feasibility are not contradictions but complement each other, creating added value for users and architectural clients.
