

The logo for clemens kirsch architektur is a graphic design. It features a large, abstract, blocky letter 'K' in black, with a smaller square element to its left. To the right of these abstract shapes, the company name is written in a bold, sans-serif font. The text reads "clemens kirsch architektur".

For twenty years now the work of our bureau has impressed through its creativity and appropriateness in design, precision & planning efficiency, and the adherence to quality, budgets and deadlines in implementation.

In this period, Clemens Kirsch Architecture has been responsible for construction projects totalling around 200 million euros, 25% of these as general planner. We are proud of having implemented all projects without any planning flaws or building damage, and always adhering to schedules and budgets.

In our work we endeavour to prove that innovation and feasibility are not contradictions but complement each other, creating added value for users and architectural clients.
